

the **Icon**

Striking design, smooth surfaces, quality materials and superb finishes sets the Icon kiosk apart. The premium high resolution, ultra responsive 32 inch or 42 inch display allows for easy viewing of pictures, text and video - from any angle, it's also created to accommodate people of all heights including wheelchair users with an innovative height adjust button.

The front opening door allows for maximum flexibility when deploying the kiosk as well as easy access to all internal components. Inside the kiosk is a premium audio solution, room for a variety of printers including standard 3-inch receipt-type as well as heavy-stock ticket printers up to 3 1/3 inches wide. Outside the kiosk is a high quality automotive type paint finish in your choice of color and room for a variety of peripherals including credit card reader, 2D imaging Bar Code scanner and camera.

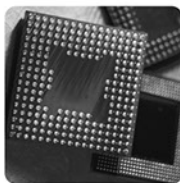

The bold and inviting appearance of the **Icon** kiosk draws your customers to it. With enhanced capabilities to show coming attraction trailers, present a large and clear display of seat selection options, sell present day or future tickets, order food and beverages, and enabling customers to submit comments on their experience, the **Icon** kiosk itself becomes an attraction for your theatre.
